BEHIND ACUMEN
THE RIGHT LIGHT STARTS HERE

ACUMEN LIGHT

Founded in Dubai, Acumen Light is a lighting engineering company that helps designers, architects, consultants, contractors, and clients make the right lighting decisions for every space.

Light is more than a technical requirement. It is a design element that shapes atmosphere, highlights detail, supports function, and defines how a space is experienced.

Acumen Light brings clarity to the lighting decision, with Global experience, reliable LED product quality, certified to meet industry standards, trusted technologies, and a 5+ years warranty on all products.

OUR ROLE

We bring together the thinking, products, and technical support needed to place the right light in the right place.

Lighting Direction

We help define what the space needs from light, aligning with the architectural theme.

Product Selection

We match each space with suitable products from a wide lighting range, including different installation ways, light effects, finishes, and technical features.

Light Supply

We provide indoor, outdoor, underwater, decorative and architectural lighting solutions.

Smart Control & Integrated Systems

We supply and support dimming, scenes, automation, and integrated systems including: Curtains, and Switches.

Execution Support

We provide all relevant installation manuals & guidelines.

Our lighting range covers indoor, outdoor, underwater, featured design collections, and smart lighting control systems for different project needs.

OUR SOLUTIONS

Indoor Lighting

Lighting solutions for interior spaces including: residential, commercial, retail, and hospitality projects.

Outdoor Lighting

Solutions for façades, landscapes, pathways, entrances, gardens, terraces, and exterior architectural features.

Underwater Lighting

Specialized lighting solutions for pools, water features, and fountains.

Featured Design Collections

Design-led lighting collections created to add character, effect, and visual identity to a space.

Smart Lighting Control & Integrated Systems

Control systems and integrated solutions that connect lighting with mood, comfort, AI and smart functions.

BY ACUMENLIGHT

SHAPED BY LIGHT

Selected projects shaped by Acumen
Light across hospitality, residential, F&B,
commercial, façade, landscape, and
special developments.

HOSPITALITY

In hospitality, light does more than illuminate a space, it shapes the experience of being received, settled, and remembered. From the first impression of arrival to the quieter moments of rest and privacy, it helps define the emotional tone of the environment.

Across hotels, resorts, and guest spaces, lights often shape architecture, strengthen atmosphere, and become part of how comfort, calm, and memory are felt.

F&B AND COMMERCIAL

In f&b and commercial projects, light sells, defines mood and builds experience.

RETAIL

Light in these projects is never one-dimensional. It must attract, reveal, and adapt to changing displays and product stories.

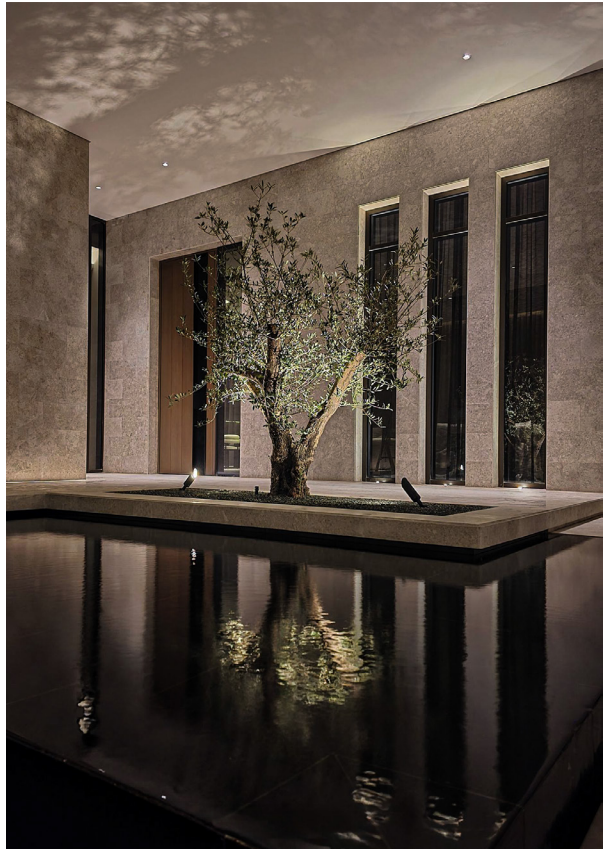

RESIDENTIAL

In residential spaces, light becomes deeply intimate. It supports the rhythms of daily life, from fresh mornings to relaxed evenings, shaping comfort in ways that feel natural and effortless. At home, lighting must do more than define form.

It needs to create warmth, soften transitions, reveal materials, and adapt to the way people actually live. Across villas, private residences, and outdoor living spaces, light brings balance between function and feeling, turning architecture into a place that feels intimate, grounded, and lived in.

PRIVATE VILLA
KUWAIT

This space is shaped by a quieter kind of light, one that settles rather than announces itself. It moves gently across surfaces, creating depth through layers instead of contrast.

The connection to the outdoors becomes central. Through expansive glazing, the landscape is carefully illuminated, allowing trees and foliage to read as part of the interior composition.

The result feels immersive, where the boundary between inside and outside softens into a continuous experience.

SPECIAL PROJECTS & LANDMARKS

In special projects, light is approached with a higher level of intention shaped to respond to distinct ideas, environments, and design ambitions. Each solution is carefully developed, allowing illumination to align closely with the concept and character of the space.

Across these projects, light moves beyond a supporting role.

مركز محمد بن راشد

MOHAMMED BIN RASHID SPACE CENTRE

مركز التحكم بالمهام
MISSION CONTROL CENTRE

The expression shifts with purpose.

Color becomes a language, translating identity into light. Through a responsive RGBW system, the façade adapts, reflecting moments, marking occasions, and reinforcing presence. The building no longer holds a single image. It evolves, responding in real time while maintaining precision and control.

Movement is extended into the ground plane. Illuminated steps guide arrival, creating a clear and continuous transition between exterior and entry. Light defines each layer, from façade to landscape, connecting the experience into one cohesive sequence.

OBJECT 1 DEVELOPMENT SPACE
Dubai-UAE

OBJECT 1 DEVELOPMENT SPACE
Dubai-UAE

Light doesn't just reveal the space here, it edits it.

Each arch becomes a quiet stage, carved out not only by structure but by illumination.

The glow traces the geometry with precision, soft enough to feel ambient, deliberate enough to feel authored. What could have been repetition turns into rhythm: four moments, subtly different, each holding a living form that feels almost incidental, like the architecture is the real subject, and everything else is just passing through.

EXPERIENCE THE RIGHT LIGHT

The Experience House was created to allow designers, clients, consultants, and project teams to experience lighting before choosing it.

Visitors can walk through real spaces and see how light works, feels, and changes the atmosphere.

From living areas and kitchens to hospitality, retail, outdoor, and smart control settings, every corner shows how the right light can support function, reveal textures, create comfort, and shape the feeling of a space.

The Dome: Giving Value to a Simple Architectural Element.

One of the moments inside Acumen Experience House focuses on the dome, a simple architectural element that gains much more presence through light. Without lighting, the dome can easily pass unnoticed. But once it is treated with the right lighting, it becomes part of the experience. The light reveals its shape, adds depth, and turns it into a soft transition moment within the space.

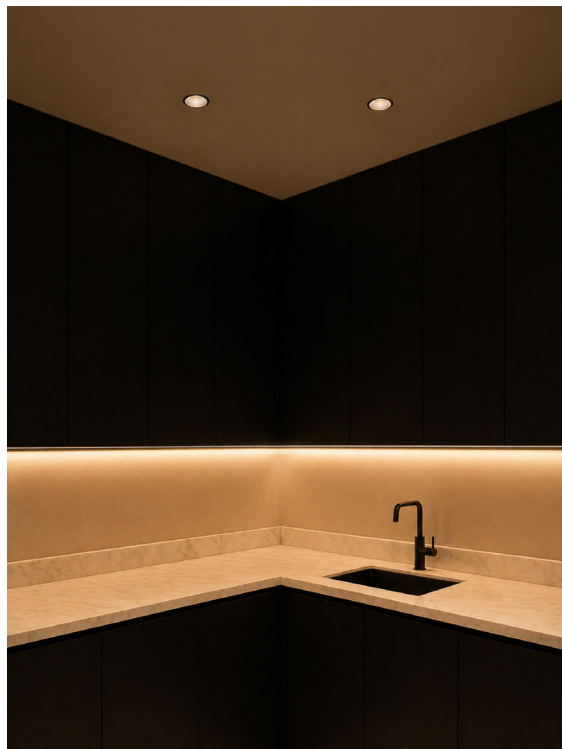

Meeting Room / Dining Concept:

One Fixture, Multiple Effects The meeting room at Acumen Experience House can also be understood as a dining room concept. In this space, one oval downlight was used to achieve a result that might normally require several standard downlights. This shows how the right fixture can reduce visual clutter while still delivering the needed lighting effect. Because the room is used for meetings, 4000K was introduced.

It was carefully combined with 3000K to maintain balance and comfort. Mixing color temperatures is not wrong when it is studied properly. In fact, it can add richness to the space when each tone supports the function and mood of the area.

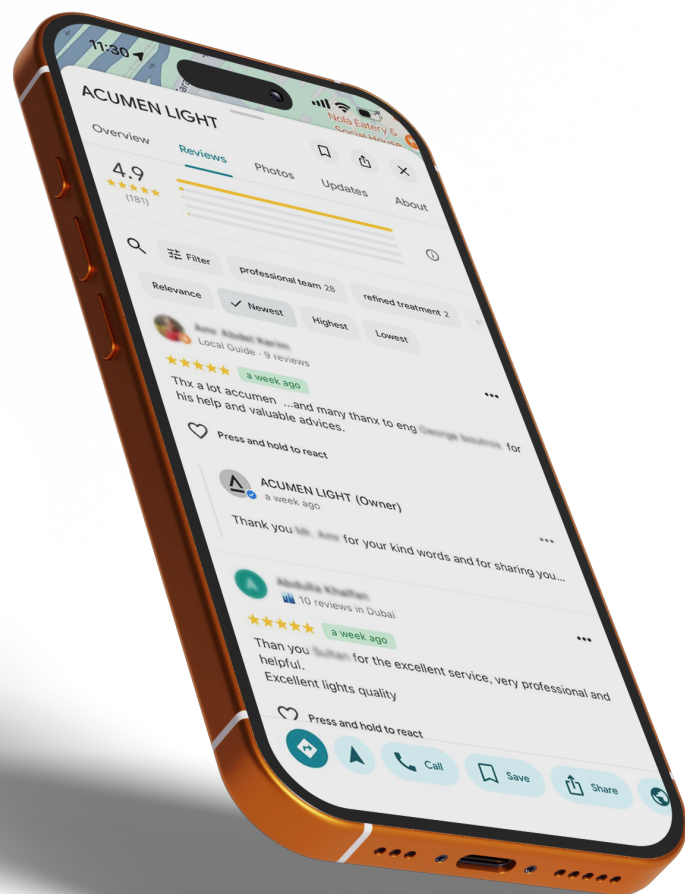

Kitchen: Task Lighting as the Priority In the kitchen, lighting must first support function. Since the kitchen is a working space used for cooking, preparing food, and making coffee, task lighting becomes the most important layer. The countertop and preparation areas need clear, comfortable, and shadow-free illumination.

POWERED BY
YOUR SATISFACTION

With more than 10 years of experience across the region, Acumen Light has earned the trust of clients whose feedback continues to reflect their satisfaction.

BEYOND THE PROJECTS

Our role does not end once products are selected, supplied, or installed.

We are powered by the confidence of our clients, and by the results they experience long after the light is placed.

- **10+ Years in the Region**

Experience worldwide projects.

- **Reliable Product Quality**

LED products selected for performance, standards, and long-term use.

- **Control Ready**

Compatible with advanced lighting control technologies.

- **5+ Years LED Warranty**

Confidence beyond installation.

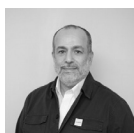

BEHIND ACUMEN

Acumen Light was founded by **Mr. Fedaa Zaatar** with a clear vision: to make lighting an essential part of how every space is designed, experienced, and remembered.

Behind Acumen Light is a multidisciplinary team of engineers and lighting professionals connecting design understanding, product knowledge, technical coordination, supply, and execution support.

Together, they bring Acumen's philosophy to life:
Placing the right light in the right place.
