

alastra

# **Born Of Nature!**

ALASTRA is a decorative lighting brand that celebrates the natural elegance of alabaster. Known for its soft glow, unique veining, and timeless beauty, alabaster is at the heart of every Alastra creation.

We design lighting pieces that are more than functional—they are sculptural elements that bring warmth, sophistication, and character to any space. Each product reflects a harmony of material honesty, craftsmanship, and refined design, allowing the organic charm of alabaster to shine through.

## The Beginnings

**Alabaster**, a remarkable stone with a rich historical legacy, was first utilized by the Pharaohs of ancient Egypt for creating sculptures. Among the notable discoveries related to alabaster is a head sculpted for Queen Cleopatra, which was found alongside 22 bronze coins bearing her image and herring. Additionally, a mask thought to have belonged to the Roman leader Mark Antony was also uncovered, highlighting alabaster's significant role in ancient artistry and royalty.

## Families of Alastra

**Signature | AlbaGate | Endeora | HaloFlow  
Cuben | Cylendra | Necklace**

A refined collection featuring chandeliers, wall, floor, and table lamps — designed to elevate every interior with timeless elegance.

# Signature

Signature is a bespoke alabaster pendant with sculptural curves inspired by the fluidity of a handwritten signature.

Hand-carved from premium Spanish alabaster, it transforms light into timeless functional art with elegance and emotional presence.

# Alba Gate Collection

Alba, means dawn in Latin, it symbolizes new beginnings.

Gates and arches have marked thresholds in civilizations from Rome to Andalusia, where light defined arrival. Alba Gate channels that same spirit. It is a passage from shadow to illumination, framed in alabaster's natural glow.

Perfect for entrances, lobbies, and transitional spaces, where lighting marks a journey and creates a sense of welcome.

# Endeora Collection

From the endless knots of Byzantine mosaics to the flowing arabesques of Islamic art, curves that repeat without end have always symbolized eternity, unity, and renewal.

Endeora translates this timeless motif into alabaster, soft loops that echo infinity, layered like waves of light.

More than a lamp, it a reminder of cycles that never break: day into night, shadow into glow, history into the present.

Perfect for dining areas, lounges, and cultural interiors, where a sense of continuity, connection, and flowing energy enriches the atmosphere.

# HaloFlow Collection

HaloFlow carries the essence of life's journeys : flexible, adaptive, always in motion. Its shapes bend and flow like experiences themselves: never linear, always evolving.

Halo: represents presence and identity, the aura each person leaves behind.

Flow: represents ease and adaptability, the art of moving through life with grace.

Designed for modern residences, boutique hotels, and F&B spaces. From fine dining restaurants to vibrant lounges.

HaloFlow creates atmospheres where light adapts to mood, shaping experiences that feel both intimate and iconic.

# Cuben Collection

The cube, is one of Plato's perfect solids, has symbolized balance and stability since Mesopotamia.

Cuben takes this archetype and transforms it with alabaster stone; made translucent, geometric yet poetic. Each glowing cube becomes a vessel of light, grounded yet alive.

Ideal for spaces that need grounding and presence such as quiet reading corners, meditation areas, meeting halls or intimate restaurant settings where light should feel stable, centered, and reassuring.

# Cylendra Collection

Symmetry has always been a language of harmony , from the mosaics of Byzantium to the courtyards of Alhambra.

Cylendra translates this timeless order into light, using the pure cylinder as a canvas for balance.

In alabaster, its symmetry glows softly, turning structure into serenity. Each piece radiates equilibrium, where form and energy mirror one another in quiet perfection.

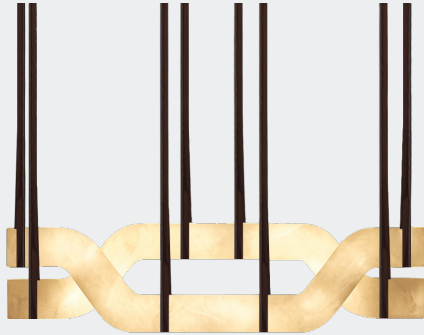

Best suited for corners, transitional zones, hallways, or open plan interiors where light defines space, and for linear layouts in dining, conference, or F&B venues where chandeliers create harmony and direction.

# Necklace Collection

Across civilizations, the necklace has carried deep meaning: a symbol of inheritance, a marker of origin, an amulet of protection, and a sign of prestige. From the ancient Egypt to the jeweled pendants of Byzantium, necklaces have always adorned the human form with both beauty and power.

The Necklace family carries this tradition into interiors.

Alabaster, shaped into luminous beads and forms, cascades like jewelry for space. Which is soft yet striking, delicate yet commanding. More than light, it is an adornment that protects, elevates, and gives origin to atmosphere.

Perfect for hotel lobbies, luxury retail shops, and intimate spaces; places where light must do more than illuminate.

Necklace adorns these environments with presence and distinction, creating atmospheres that feel both refined and memorable.
